Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added a new use on garden beets to the product label of Poast Ultra Liquid Emulsifiable Herbicide, containing technical grade sethoxydim. The specific use approved in Canada is detailed on the label of Poast Ultra Liquid Emulsifiable Herbicide, *Pest Control Products Act* Registration Number 24835.

A corresponding maximum residue limit (MRL) was proposed in the consultation document published on 10 February 2010, Proposed Maximum Residue Limit PMRL2010-07, *Sethoxydim*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRL was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRL takes legal effect as of the publication date of this document and is in addition to the MRLs already established for sethoxydim.

Established Maximum Residue Limit for Sethoxydim

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Sethoxydim	(±)-2-[1-(ethoxyimino)butyl]-5-[2-(ethylthio) propyl]-3-hydroxy-2-cyclohexen-1-one and metabolites containing the cyclohexen-2-one moiety, expressed as sethoxydim	0.15	Garden beet roots

A complete list of all MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
